BEST SELLER!

Ice Cream Truck

Grades 2-6

Build operations and data management skills!

Your elementary students get 'two scoops' of math learning fun when they take on the role of an owner of a busy ice cream truck! Students plan for their selling day – buying merchandise, advertising on their trucks, and setting prices. On-screen tools help them plan and stay profitable.

Problem-solving skills grow as students experience, firsthand, a real-world application of mathematics and learn the relationship between costs, pricing, and profit in a simple non-competitive marketplace.

A detailed teacher's guide provides numerous extension activities.

Curriculum Skills

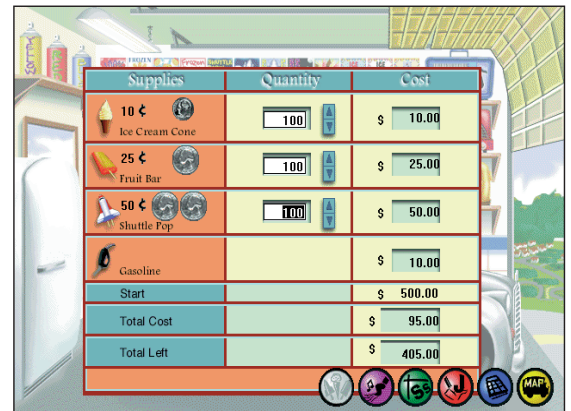

- Develop basic operations skills and concepts, addition, subtraction, multiplication, and division
- Build money sense
- Collect, organize, and analyze data
- Learn to solve problems and make decisions

Special Features

- Two levels of difficulty
- On-screen journal for record keeping
- Simple spreadsheets to track sales information

**It's seven o'clock on a Monday:
where should you go to sell your ice cream?**

Students use an on-screen journal for project costs.
